

Progress Report
NASA-NSTA YOUTH SCIENCE CONGRESSES
January 27, 1965

N-65 81742

C. H. Love

After NSTA was assured that contract NASr-170, #1/09-0130002/BJH: aaa would be signed in mid-October, 1965, action was begun to secure regional chairmen to work with the educational officers of NASA centers.

The contract was finalized on November 10, 1965. An orientation meeting for both NASA and NSTA personnel was scheduled for November 13, 1965, in Chicago. At this meeting the basic operational methods for the 1965-65 Youth Science Congresses were gone over.

Next, a pre-announcement flyer was produced and circulated to science and mathematics heads of high school departments. Application forms were included in the flyer (a copy is attached for your information). These flyers were also sent to supervisors of science and members of NSTA.

Then a series of forms was produced and circulated to the regional chairmen. When comments are received, these will be put out in final form. Dates have been set to conduct a National Youth Science Congress on June 23-26, 1965.
